

314 CMR 3.00

3.19 Standard Permit Conditions

...

(20) Reporting Requirements

(h) Indirect Dischargers. All Publicly Owned Treatment Works shall provide adequate notice to the Department of the following:

1. Any new introduction of pollutants into the POTW from an indirect discharger where such pollutants ~~which~~ would be subject to 33 U.S.C. ~~1251- 1317~~ Sections 301 or 306 or 314 CMR 3.19(20)(g) (“Toxics”) if it were directly discharging those pollutants; and
2. Any substantial change in the volume or character of pollutants being introduced into the POTW by a source introducing pollutants into the POTW at the time of issuance of the permit.
3. For the purposes of 314 CMR 3.00, adequate notice shall include information on quality and quantity of effluent introduced into the POTW, and any anticipated impact of the change on the quantity or quality of effluent to be discharged to the POTW.

Addition to 314 CMR 3.00

314 CMR 3.11 Permit Conditions:

Ad the following new subsection to 3.11(2)(a):

(11) Conditions that require a permitted facility, where in any given calendar year the average annual flow exceeds eighty percent (80%) of the facility’s average design flow, to submit a report to the Department describing what steps the permittee will take in order to remain in compliance with the limitations and conditions in its permit, including in particular, limitations on the amount of flow authorized to be discharged under the permit.
